

Telemetry for Nature

DISCOUNT FOR ARTICLE AND PICTURES

We deeply believe in having a win-win relationship with our customers where we can both obtain extra benefits.

We also want to promote a Net of Researchers devoted to the wildlife conservation through a forum, a free newsletter and a page in our website called "Researcher's area".

For these reasons we offer an extra discount of 3% on any of our VHF transmitters (TX) on orders of 49 units or less, and 1.5% on orders of 50 or more units, to those projects that wish to take this proposal. This is on top of our best price guarantee by at least 10%.

The acquired commitment by accepting this discount includes to provide Telenax with an article of 3 to 5 pages about your research and experiences with Telenax's equipment; and at least 5 pictures of the transmitters attached to the animals.

These should be given to Telenax in no later than 6 months from the date of the equipment delivery. Otherwise the customer commits to reimburse the discounted amount.

Pictures and article in both English and Spanish will be included in Telenax's newsletter, in its website page called "Researcher's area", and to promote our products.

This offer is not offered in every quote in order to avoid disturbing our customers. Instead it is granted upon request. Discount is granted to every customer who requests it, but it can only be given once per research project.

.For any questions or concerns please don't hesitate to contact us
